Disability Insurance – Replaces a portion of your income to help make ends meet if you become disabled from a covered accident or covered sickness. *23.2 million disabling injuries were reported in 2004.*¹

Accident Insurance – Helps offset the unexpected medical expenses, such as emergency room fees, deductibles and copayments, that can result from a fracture, dislocation or other covered accidental injury. *There were about 27 million visits to hospital emergency departments for injuries in 2003.*¹

Cancer Insurance – Helps offset the out-of-pocket medical and indirect, non-medical expenses related to cancer that most medical plans don't cover. This coverage also provides a benefit for specified cancer-screening tests. *In the U.S., men have a one-in-two lifetime risk of developing cancer, and for women the risk is one in three.*²

Critical Illness Insurance – Complements your major medical coverage by providing a lump-sum benefit that you can use to pay the direct and indirect costs related to a covered critical illness, which can often be expensive and lengthy. *On average, every 45 seconds, someone in the United States has a stroke.*³

Hospital Confinement Insurance – Provides a lump-sum benefit for a covered hospital confinement and a covered outpatient surgery to help offset the gaps caused by copayments and deductibles that are not covered by most major medical plans. *Hospital spending, nearly one-third of total national health expenditures, increased 8.6 percent in 2004.*⁴

Life Insurance – Enables you to tailor coverage for your individual needs and helps provide financial security for your family members. *A helpful rule of thumb to determine the amount of life insurance you may need is to multiply your current salary by five to eight years.*
